

Polyguard[®] Underseal[®] Blindside[™] Membrane

Sheet Waterproofing Membrane

Features & Benefits

Available in: 200 SF Rolls
48" x 50' roll
1 roll per carton

- **Superior Protection:** 3-layer composite membrane
- **Superior Puncture Resistance:** Strong puncture resistance, greater than 217 lbs., which provides resistance to concrete construction abuse
- **Superior Resistance to Water Migration:** Eliminates water and vapor migration by forming a strong mechanical bond to the concrete
- **Superior Adaptability:** Flexible material that adapts to jobsite irregularities for ease of installation
- **Superior Joints:** Fully-adhering, watertight laps
- **Superior Crack Protection:** Stress-absorbing and elongation properties to maintain a watertight seal to the structure
- **Superior Adhesive Bond:** Forms a strong mechanical bond when the concrete, at time of pouring, intermingles with the fibers of the nonwoven geotextile
- **Superior Barrier:** Acts as a barrier against toxic contaminants, including methane and radon gas, which may attempt to enter the structure through cracks in the concrete
