HEADLINE: POLYGUARD INTRODUCES ADDITION TO ALUMAGUARD® PRODUCT LINE

Sub-headline: Alumaguard® Lite White added primarily for indoor use

ENNIS, TX – Polyguard Products’ Mechanical Division has announced the release of its newest product, Alumaguard® Lite White, to its family of flexible cladding membranes.

Alumaguard Lite White is a peel-and-stick membrane primarily designed to be used indoors for mechanical rooms, food production areas or other indoor applications where a glossy white appearance is desired, and outdoors to weather-proof exterior insulated ductwork, piping or other insulated tanks, vessels and equipment. It can also be used indoors on pipe systems and ductwork where a true zero perm vapor barrier is preferred. The easy-to-apply membrane meets ASTM 84 25/50 smoke and flame requirements. For outdoor application, it provides enhanced resistance to a broad range of chemical exposures and can be applied in temperatures as low as 10°F.

With Alumaguard 60 in 1998, Polyguard introduced the mechanical and HVAC industries to flexible weather-proof cladding. That introduction has led to a family of Alumaguard products including Alumaguard, Alumaguard All-Weather and Alumaguard Lite. Engineers and contractors now have products to meet any application condition both indoors and out.

More details of the product and the entire Alumaguard line of products are available online at www.polyguardproducts.com.

Alumaguard Lite White is shown above.

Founded in 1953, **Polyguard Products** specializes in products which protect surfaces and structures from moisture, water, or other undesired substances. Polyguard is an industry leader in the production self-adhesive protective coatings for engineering and construction. Polyguard is also a 100% employee-owned ESOP with 22 consecutive years of sales growth.
