HEADLINE: TERM BARRIER SYSTEMS BECOME GREENPRO PARTNER

ENNIS, TX – TERM Barrier Systems by Polyguard Products Inc. is now a GreenPro Partner.

The National Pest Management Association's GreenPro program is the world's largest and most credible green certification program for pest management professionals. GreenPro recognizes companies within the pest management industry that are committed to providing commercial and residential customers with reduced risk, comprehensive, and effective pest control services.

The GreenPro Partner designation allows the TERM Barrier System to be used as a tool by builders, architects, and QualityPro certified Pest Management Professionals in a pest prevention strategy. For more information on the TERM Barrier System and ways in which it may be integrated into a GreenPro program, please visit www.polyguardbarriers.com.

Founded in 1953, Polyguard produces materials to protect buildings from moisture, corrosion, and energy leaks. Polyguard's TERM Barriers, the latest innovation, means that buildings can have insect exclusion added to the moisture, corrosion, and energy leak protection. Polyguard is 100% employee owned, and has generated 24 successive years of sales increases since 1992.
